"You'll have to shut up shop and get out of the neighborhood," Titus told Henron recently.

"Oh, will 1?" sneered Benson, "Don't you remember what happened to

Before making the raid Costigan sent three men to the house. One took his stand in the rear and another in the front. The third reached the roof by way of the house next door. illustrated Lecture on Bird Life by Dr. Hornaday of the New York Zoological Park.

INDIANAPOLIS, Oct. 2. - "The improvement in the blueblooded bree hogs and cattle within the pas 100 years," declared Dr. William A Evans of Chicago in his address be fore the fourth National Conservation Congress.

Prof. George E. Condra of Lincoln Neb., declared great progress had been made in all branches of conservation. He added that the movement was being taken out of politics and placed on an educational basis.

E. L. Allen, a forester of Portland Ore., made a plea for better forest legislation. Illustrated lectures on various phases of bird life were given by T. "TOBACCO USERS ARE NOT FIT PROGENITORS."

WASHINGTON, Oct. 2 - "Tobacco users are not fit progenitors. Tobacco is the most poisonous plant grown, the smoke being as poisonous as the leaf." These placarded declarations at the Exposition Hall of the International Congress of Hyglene and Demography

caused a post-congress row yesterday.

giene showed the charts attacking the users of tobacco. These charts charged that tobacco is a "breeder of immorality." It was classed with alcohol as one of the chief provocatives of the White Slave rvil. The children of victims of the tobacco habit, it is alleged, would be weaklings.

From smokers there came a protest to Dr. Schereschewsky, director of the exhibition, himself a smoker, who ordered the placards down.

From Dr. Charles G. Pease of New York, President of the Non-Smokers' Protective League, came a letter of protest in which he said:

"A fancier would not select polsoned animals from which to broad stock, neither should poisoned individuals be permitted, to propagate. Mark Twain died a victim of the poison. So did then Grant, and the surgeons said that President McKinley would have recovered from his sunshot wound had he not had a tobacco heart."
